

INDEX
JAVASCRIPT

S.NO.	Title	Page No.
1.	What is JavaScript?	01
2.	Features of JavaScript	02
3.	Application of JavaScript Window Object Hosting	03
4.	JavaScript Variables ○ Let ○ Var ○ Const	05
5.	Rule of Identifiers	06
6.	Scopes: ➤ Global Scope ➤ Script Scope ➤ Block Scope ➤ Local Scope ➤ Functional Scope	06
7.	Ways to add JS Code	07
8.	Advantages and Disadvantages of Internal JS	08-09
9.	Comment	10
10.	History of JavaScript	11
11.	ES6 New Features	12
12.	JS Engine ▪ Parser ▪ AST (Abstract Syntax tree) ▪ Interpreter ▪ Compiler	13
13	Asynchronous Callback Task Queue Event Loop	13.1-13.2
14.	Output Methods ○ Console.log () ○ Console.warn () ○ Console.error () ○ Alert () ○ Prompt () ○ Confirm ()	14
15.	Datatype	15
16.	Type-Casting ➤ Implicit Type Casting ➤ Explicit Type Casting	16-18
17.	typesof Data	19-20
18.	Global Variable	21

19.	Local Scope Functional Scope Block Scope	21.1-21.3
20.	String String Methods: 1. Length 2. Slice () 3. substring () 4. subStr () 5. replace () 6. replaceAll () 7. toUpperCase () 8. toLowerCase () 9. concat () 10. trim () 11. trimStart () 12. trimEnd () 13. padStart () 14. padEnd () 15. charAt () 16. charCodeAt () 17. Split () etc.	22-28
21.	Implicit Return Explicit Return	29
22.	Types of Function ➤ Anonymous Function ➤ Named Function ➤ Function with Expression ➤ First Class Function First Citizen Function ➤ Arrow Function ➤ HOF (Higher Order Function) ➤ Callback Function ➤ Recursive Function ➤ Generator Function ➤ IIFE (Immediate Invoke Function Expression) ➤ Currying Function ➤ Nested Function ➤ Async/await Function	31-51
23.	Global Execution Context	44
24.	Closer	45
25.	Lexical Scope	45-46
26.	Prototype	46.1-46.2
27.	Array • Method Chaining • Array Iterator	52-53
28.	Array Helper Methods: 1. push () 2. pop () 3. unshift () 4. shift () 5. slice () 6. splice () 7. join () 8. fill () 9. includes ()	54-63

	10. indexOf () 11. lastIndexOf () 12. Flat () 13. Reverse ()	
29.	Array Higher Order Methods: 1. map () 2. filter () 3. reduce () 4. some () 5. every () 6. find () 7. findIndex () 8. sort () 9. forEach () 10. concat ()	64-78
30.	String Methods of examples	79-82
31.	Convert Array to String: ➤ toString () ➤ join () ➤ toLocalString () ➤ JSON.stringify () ➤ Reduce ()	83
32.	Objects	84-86
33.	Inbuild Object Methods: ○ freeze () ○ seal () ○ assign () ○ entries () ○ keys () ○ values ()	87-90
34.	Ways of creating Object: 1) Object literal 2) create () 3) assign () 4) structuredClone () 5) Object Constructor 6) JSON.stringify() + JSON.parse() 7) defineProperty () 8) defineProperties () 9) Constructor function	91-95
35.	ProtoType Object	94-96
36.	for-of loop for-in loop	97
37.	Array of Objects	97
38.	Spread Operator Rest Parameter	98-100
39.	Destructuring of Array	101
40.	Destructuring of Object	102
41.	Destructuring of the Array and Object in function	103-104
42.	Copy of an Object	105-106

43.	Cloning of an Object 1) Shallow Cloning Shallow Copy 2) Deep Cloning Deep Copy	107-111
44.	Object to Array Convert	112
45.	Array to Object convert	113-114
46.	Truthy and Falsy Values	115
47.	Date Object	116-117
48.	Math Object	118-120
49.	This Keyword	121
50.	BOM and DOM	122-123
51.	DOM methods: 1) getElementById () 2) getElementsByClassName () 3) getElementsByTagName () 4) querySelector () 5) querySelectorAll ()	124-129
52.	InngerHTML and InnerText	130-131
53.	Timing Events: a. setTimeout () b. setInterval ()	132-135
54.	Local Storage Session Storage	136-138
55.	Promises State of promise: a) pending b) fulfilled c) rejected	139-140
56.	Instance Method: ○ then () ○ catch () ○ finally ()	141
57.	Static Methods of Promise: 1. all () 2. allSetteled () 3. any () 4. race ()	142-149
58.	addEventListener ()	150
59.	Callback Hell	151-152
60.	async/await then/catch	153-156
61.	Set Object	157-160
62.	Map Object	161-164
63.	Prototype Object	165-167

64.	JS Events JS Mouse Events: 1. onclick () 2. onmouseover () 3. onmouseout () 4. onmousedown () 5. onmouseup () 6. onmousemove () JS Keyboard Events: 1) onKeyDown () 2) onKeyUp () JS Form Events: 1. onfocus () 2. onsubmit () 3. onblur () 4. onchange ()	168-171
65.	Window/Document Envents: addEventListener() A. onload B. onunload C. onresize D. ondblclick	172-183
66.	HTML form events: 1) onblur 2) onchange 3) onfocus 4) oninput 5) oninvalid 6) onreset 7) onsubmit	184-186
67.	HTML Keyboard Events: 1. onkeydown 2. onkeypress 3. onkeyup	187
68.	HTML mouse events: 1) onclick 2) ondblclick 3) onmousedown 4) onmousemove 5) onmouseout 6) onmouseover 7) onmouseup	188-189
69.	WeakSet	190-191
70.	WeakMap	192-193
71.	Event Bubbling Capturing Propagation Immediate propagation Prevent default	194-189
72.	Promise Object	199-200
